No Attempt Is Made to Carry Further the Brisk Rally of Yesterday.

NOTE—All market news on prices (unless buy or bid be this page reflects closing sale specified) Thursday, May 8.

New York. May 8.—Lack of demand for stocks again characterized trading today and no attempt was made to carry further the brisk raily of yesterdays late session. This invited some professional selling, on the assumption that recent advances have been largely at the expense of the short interest, but the volume of offerings was small. Price matematis were correspondingly narrow, only a few issues varying as much as a point during the forenoun. The movement as a whole was slightly downward. Less attention was paid to the character of the foreign markets, as traders have given up hope of extensive European buying for the present. Honds were irregular.

Amalgamated moved up briskly on the good showing made in the producers' monthly statement, which reported a decrease of nearly 20.000,000 pounds in stocks on hand. Elsewhere there was a firmer tene, but buying was seant.

The statement of the Copper Producers' association as on May 1 shows a decrease in stocks on hand of 28, 110,162 pounds, compared with the previous month.

An easier tendency was manifested.

vious month.

An easier tendency was manifested in the late afternoon, largely a result of concetted pressure against Canadian Pacific, which yielded over two Recessions otherwise were slight and

stocks began to take effect.
The decrease was in excess of all estimates and compares with a reduction of about 15,000,000 pounds in the preceding month. Production for April was very little less than in March, but cotal deliveries were greater by 3,000,100 wounds.

total deliveries were greater by 8,000,000 pounds.

The market closed easy. While the
government crop figures more than
sustained the opinion of private experts as to conditions, the showing fell
flat as a stock market influence. In
fact the range of prices was lower
after its publication, although the
mevement was manifestly due to reallaing in the coppers and pressures
against the Pacifics.
